## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, 23-26, 31, and 32, drawn to a population of insulin-producing cells, and a method of differentiating insulin-producing cells with a growth factor of GLP-1 or homologues and fragments thereof.

Group II, claim(s) 12-22, 27-30, 31 and 33 drawn to a population of insulin-producing cells, and a method of differentiating insulin-producing cells with a growth factor of exendin-4 or homologues and fragments thereof.

Group III, claim(s) 34 and 35, drawn to a method of treating diabetes with GLP-1.

Group IV, claim(s) 36-38, drawn to a method of treating diabetes with exendin-4.

Group V, claim(s) 39-41, drawn to a method of treating diabetes with patient's own insulin-producing cells.

Group VI, claim(s) 42-44, drawn to a method of treating diabetes with patient's own insulin-producing cells with altered surface antigens.

Group VII, claim(s) 45-48, drawn to a method of treating diabetes with donor's insulin-producing cells.

Group VIII, claim(s) 49-52, drawn to a method of treating diabetes with donor's insulin-producing cells with altered surface antigens.

Pursuant to 37 C.F.R., the main invention in the instant application comprises the first-recited product, a population of insulin-inducing cells, and the first-recited method of making that product, namely the method of differentiating insulin-producing cells with a growth factor of

GLP-1 (Group I invention). The additional methods of Groups II-VIII inventions do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same technical feature as they require different compounds, distinct methods steps, and are for different purposes.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
